

**Name, age & hobby's - Barbara van Munster (49)**

- Running
- Gardening
- Reading
- Beekeeper

**In which institute/organization are you working?**

University Medical Center Groningen

VOILA – RL1-3

**What's your role in VOILA? What would be the best outcome for you?**

I am a professor in geriatrics and involved in research line 1. I am involved in cohort studies and clinical studies

It would be great to build a national network for research in older people, because they are often excluded from scientific research. Also it would be a challenge to build a bridge between preclinical and clinical researchers.

**Mention your Pension. What will you be doing?**

I hope to be a healthy old person enjoying live for so longue as it is possible, doing all the things that I always wanted to do, but was too busy for.
