

Sebastian Mackedenski (33)

Hobbies:

- Creative writing
- Camping
- Classic cars
- Coffee

In which institute/organization are you working?

ERIBA/UMCG

What's your role in VOILA? What would be the best outcome for you?

I am a PhD student aiming to further understand non-coding RNA networks and RNA-sensing pathways activated in senescent cells. Ideally, my research will connect RNA-based interactions to a senescence-associated phenotype in diseased musculoskeletal tissue and uncover novel senescence markers and/or therapeutic targets.

Mention your Pension. What will you be doing?

Enjoy the fruits of our labour far into the future, on Mars.
